

Hydro-Electric Power Generation

As energy prices rise and the desire for clean energy security receives economic stimulus, hydro electric energy seems headed for growth. For the best part of a century, South Central Pennsylvania has been the hub of manufacturing of hydroelectric turbines and systems. Two leaders manufacture their turbines here: American Hydro and Voith Siemens. The equipment and skilled work forces which produce these precision turbines are at work here every day.

Listing these outstanding firms alphabetically, information about American Hydro can be obtained from their web site www.ahydro.com, or contact Bill Colwill at 717-755-5300 or e-mail BColwill@ahydro.com. You may learn about Voith Siemens hydro on their website www.voithhydro.com and communicate with Stan Kocon at 717-792-0729 or e-mail Stanley.kocon@voith.com
